

Pentagon 2000 is excited to bring you an award-winning electronic payments solution.

## Unleash the Power of Electronic Supplier Payments

In partnership with Paymerang, Pentagon 2000 has developed a simple, secure and profitable way to use the ACH module to automate and streamline invoice disbursements.

With less than 20 hours of total staff time required, you can have a full scale B2B ePayment program in place that reduces AP work, eliminates payment fraud risk, lowers costs and generates a new revenue stream for your organization.

### Simple

Paying suppliers has never been easier. We'll take care of enrolling your vendors, processing all payments and handling reconciliation and follow-up.

### Secure

We go the extra mile to protect your payments—enrolling your suppliers online, encrypting their bank account information and storing it on your behalf. Data is acquired, encrypted, compliant and secure.

### Profitable

Virtual card payments offer cash-back rewards that are paid quarterly and cover transaction fees, meaning there's never any out-of-pocket expense for you.

Launch before September 30th and get Paymerang implementation fees waived.

# HOW IT WORKS

## Upload Pentagon ACH File

During implementation we match or enroll all your vendors in our database. When it's time to pay them, all you have to do is upload your file.

## You fund

Once you've uploaded your file, you can review your batch to make sure it's correct, and fund all your payments with the touch of a button.

## We remit

Using innovative payment decisioning technology, we remit payment and remittance details to your vendors via email, fax, telephone or online.

## We reconcile

We reconcile your virtual card, ACH and check payments. Any canceled or refused payments are promptly refunded back to you.

## We pay cash rewards

Every quarter we issue an ACH credit to your account and provide a detailed statement showing rebates, transactions and dollars processed.

# WHAT YOU GET

**Greater efficiency**  
through processing  
and payment  
reconciliation

**Greater security**  
through encrypted  
account data and two  
levels of authentication

**Greater speed**  
through fast  
implementation and an  
easy-to-use interface

**Greater support**  
through a dedicated  
team of payment  
specialists
